The Riley Group

The Riley Group has hired three new staff geologists: **David Stariha**, **Jaycob Davies** and **Sierra Kindley**. Stariah brings over seven years of experience in the geotechnical engineering field. Stariha earned his Bachelor of Arts in Environmental Studies while attending Pacific Lutheran University. He is currently transitioning to RGI's environmental department where he will perform field work and project support. Stariha's work will include soil and groundwater environmental sampling, onsite drilling and remedial investigation oversight.

Stariha

Davies

Kindley

Davies earned his Bachelor of Science in Geology while attending Western Washington University. His previous experience includes providing onsite geotechnical construction monitoring, and reporting in detail the soil and stormwater conditions to clients. He is currently supporting RGI's environmental department by performing project research and support for phase I environmental site assessment reports, field activities and drilling oversight for phase II environmental subsurface investigations.

Kindley earned her Bachelor of Arts in Geology and Environmental Studies while attending Augustana College, and her Master of Environmental Management from the Water Resources Management Program at Duke University. At RGI, she supports the environmental department by conducting agency file reviews and research, site-specific historical assessments, and report preparation and documentation for phase I environmental site assessments and phase II subsurface investigations.
